

## COVID-19 at-home test kits

This notice is to inform you we have recently made a change to the list of products we cover(our formulary). COVID-19 at-home test kits have been added to the formulary on 01/03/22.

### What this means for you

Members can now get up to 4 test kits per calendar month from a retail pharmacy with or without a prescription.

To obtain test kits with a prescription, Providers may write a prescription for one of the preferred products on the list below.

To obtain test kits without a prescription, Members will need to tell the pharmacy staff they would like to purchase one of the preferred products in the list below. The pharmacy will submit a claim to Aetna Better Health of Texas, so the cost of the test is covered.

### Preferred products list

The table below shows our preferred COVID-19 test kits.
