<p>340B Drug Program</p>	<p>340B covered entity</p>	<p>Aetna Better Health of Illinois has determined that our configuration for Medicare Part B 340B drug reimbursement has not been properly reducing payment by 22.5% for outpatient drugs. If you are a 340B covered entity and part of the Prime Vendor Program, it is expected that your claims for 340B drugs purchased through the program should include either the JG or TB modifier. When the JG modifier is appended, the 22.5% reduction will occur. If the TB modifier is present, no reduction in payment will occur.</p>	<p>Aetna Better Health of Illinois is taking steps to configure its system to align with Medicare's requirement. We will be recouping and correcting overpaid claims dating back one year from DOS July 1, 2018, to present. As we work on the configuration, which includes a 3-step validation (provider is 340B covered, the drug is a 340B drug, and the JG modifier is present) before reducing the payment, we are exploring the timeline for the recoupment with our claims department.</p>	<p>In process.</p>
